# HCal Tile Tests
Christopher McGinn
2020.03.17

- Raw tile scans; Average voltage
- Performed over x-y grid (100x30 cm) with pulsing LED at 1 cm intervals

- Top:
    - "Good" tiles (identified blind from set of 4)
    - B26.1524.4154
    - B26.1561.4267

- Bottom:
    - "Bad" tiles (identified blind from set of 4)
    - B26.1573.4302
    - B26.1573.4303

Averages over 4 cm slices in X

- Averaging over a 4 cm slice in x, plotted as function of position in y
- In general, the hierarchy is (greatest to least response):
  - B26.1561.4267
  - B26.1524.4154
  - B26.1573.4302
  - B26.1573.4303
