

1. Run22 and before bought methane from Praxair, now Praxair is under Linde. **Linde == Praxair**
2. Last run because of methane shortage got two 6-packs from Airweld, a company we never bought from.
 1. But we didn't use this gas last year.
3. During this run, until ~May 24, we were using Praxair cylinders.
4. Then we stated to use gas from Airweld
5. On ~May 30, switched to the second Airweld cylinders.
6. For this year run we have ordered gas from Airgas
 1. Praxair (Linde) withdraw from contract, because of methane shortage. Only Airgas accepted our order
7. In my understanding and from talking to the vendors, methane produces are same, only the supplier is different.

Praxair delivered gas

Airweld delivered gas
